MEGAWOOD IN BRIEF

- 75 % softwood content
- Especially long-lasting
- Low maintenance
- No painting or oiling
- No dangerous splinters
- Natural looking surface
- Wide colour range
- PEFC environmentally friendly

Masterful.

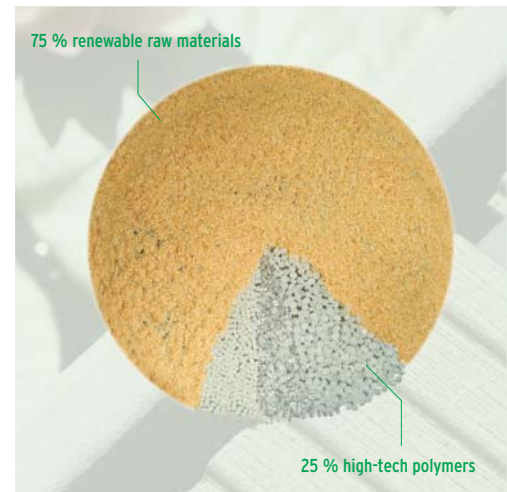

LONG-LASTING NATURAL QUALITY

True masters are not heaven-sent. In **megawood**®, natural talent and long-standing experience are combined to form a material that can be applied almost without limits. Comfortable natural product properties are a pleasure for anyone who likes terraces and decks.

You will be able to enjoy **megawood**® barefoot floors for a long time because compared to wood, they have a longer lifetime and are easier to clean. 75 % natural wood fibres and 25 % high-quality polymer binding agents and additives provide your terrace with a natural surface and make it almost indestructible. There is no need for painting and oiling since **megawood**® does not turn grey, as wood does. And do not worry about walking barefoot: There are no dangerous splinters!

megawood® fulfils the high expectations of the quality seal "Quality and Test Requirements for Wood-Polymer Materials". The natural components of **megawood**® are produced from 100 % local wood products, sustainably cultivated and PEFC-certified.

DESIGN FLEXIBILITY

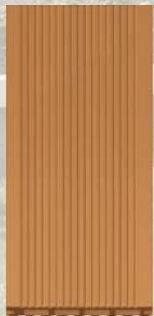

Hollow section, grooved, 145 mm

Solid floorboards, grooved, 145 mm

Jumbo floorboard, grooved, 242 mm

Natural brown

Nut brown

Basalt grey

Versatile.

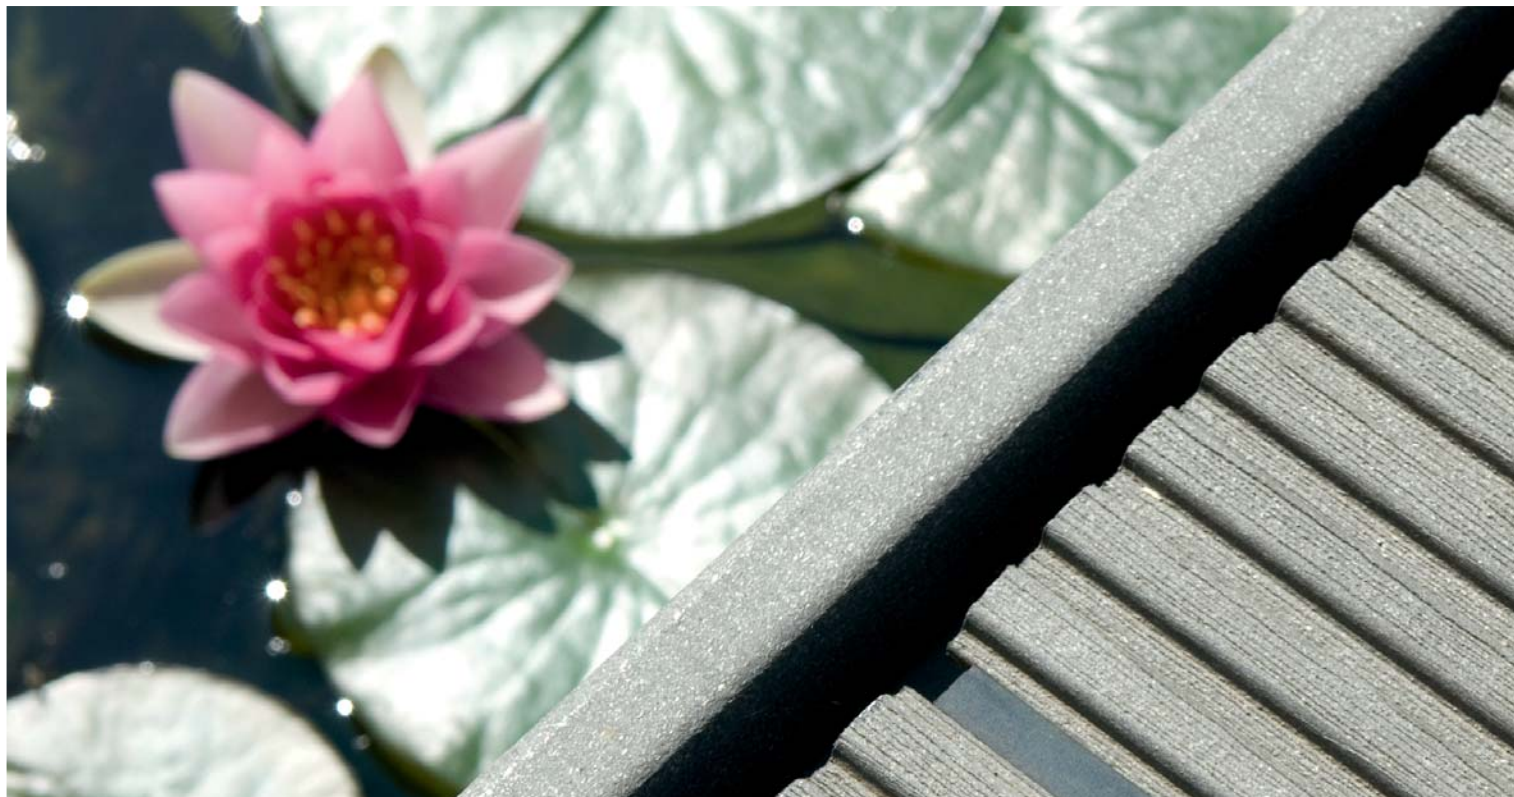

MULTIPLE DESIGN OPTIONS

megawood® is a true master of metamorphosis. Design your individual dream terrace in the three available colours of nut brown, natural brown and basalt grey. Choose one of the two surface structures or combine as you like.

megawood® barefoot floorboards are not only available as light hollow sections. For your special demands, our designers have developed our solid floorboards, which are truly durable with proven ingenious qualities when laid. For installation without prescribed incline, steps, round parts and balconies are easy to deal with our solid boards.

megawood® barefoot floorboards have no "top" or "bottom". Finely grooved or widely grooved - our dual-sided surface structures provide your family with a high degree of comfort and safety, as they are slip proof even when wet.

FLOORBOARDS IN PROFILE

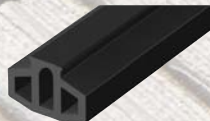

Open deck: Installation as above ground mounting or ground level deck.

Closed Deck: Installation as above ground mounting.
Only suitable for stilt-supported terraces ventilated from below.

Natural rubber profile "groove strip"
For closed decks.

Inseparable.

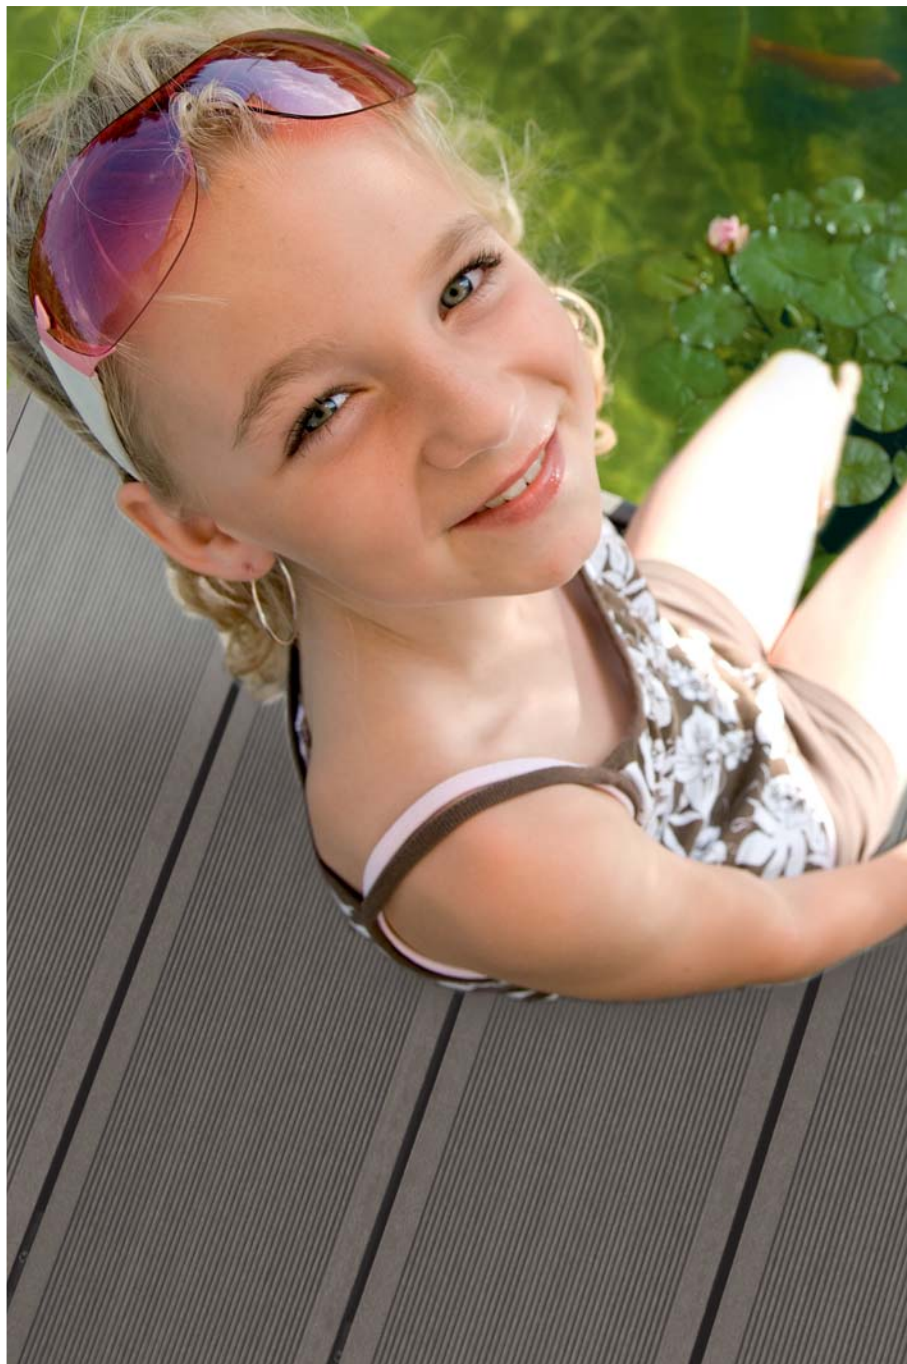

A PERFECT MATCH

Did you know that it is possible to lay **megawood®** terraces and decks not only with classic expansion grooves? Unlike with open laying, the special natural rubber profile strip fills the joints between your **megawood®** barefoot floorboards perfectly. Our **megawood®** groove strip absorbs forces flexibly - a perfect match for the barefoot floor.

By the way, **megawood®** is also very suitable for short legs. If you want to reach your terrace without steps, you should decide to have an open deck laid at ground level. If you prefer higher ground we recommend the above ground variant, either closed or open.

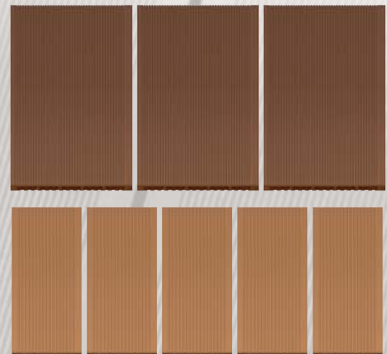

Looking for lost cutlery will no longer be an issue due to the groove strip.

BAREFOOT FLOORBOARD JUMBO - GIGANTIC SIZE!

- **Fewer floorboards** for more width
- **Impressive** board width of 242 mm
- **Generous** proportions
- **Unique** appearance
- **Wide range** of colours

Side-by-side comparison:
Jumbo floorboard (242 mm) / barefoot floorboard (145 mm)

Grown up.

BAREFOOT FLOORBOARD JUMBO

Generous proportions and a unique appearance characterize our **megawood®** barefoot floorboard Jumbo, the ideal choice for large terraces. Its gigantic width of 242 mm makes it unique and it is far easier to lay. This size is almost impossible to achieve with real wood. Fewer floorboards can create more width and more room to play for a child's small feet.

Of course, our **megawood®** barefoot floorboard Jumbo is available in two surface types and our three colours nut brown, natural brown and basalt grey.

The groove strip is an ideal addition for Jumbo floorboards. This combination can fulfil your dream of a closed terrace deck very economically. The groove strip is suitable for stilt-supported terraces well ventilated from below.

Fewer joints, fewer clamps, far easier to lay – at the same dimension.

MEGALITE® LED FLOOR SPOTLIGHTS

- **Economic** low energy consumption
- **Elegant** application
- **Various** sizes and colours
- **Atmospheric** in summer nights
- **Comfortable** with dawn sensor

Illumination.

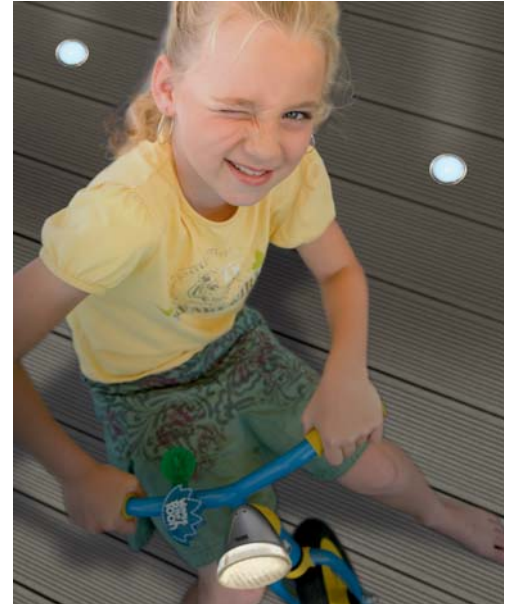

MEGALITE® - BRIGHTENS UP YOUR LIFE

Your terrace is bright and inviting not only when the sun is shining. Our **megalite**® LED floor spotlight is an elegant addition to **megawood**® barefoot floorboards. Available in the sizes "Maxi" and "Mini", they are perfectly integrated into their environment, giving your terrace a romantic atmosphere. The LED spotlights from stainless steel and safety glass are available in blue and warm white.

The **megalite**® LED light system is equipped with a dawn sensor; it switches off automatically. Simply unforgettable. Due to modern LED technology, **megalite**® floor spotlights are very economic; they only consume 0.9 Watts ("Maxi") or 0.4 Watts ("Mini").

Accentuated light effects, orientation points or path lighting – they are a highlight for every terrace.

New!

megawood® screens

New!

megawood® recreational bench "Robin"

Extending the family.

RELAXING PRIVACY

The latest addition to the **megawood®** product family complements your terrace with screens and benches. Our development team has used new profiles and material combinations to extend our product portfolio, so that you can relax privately on your new terrace, protected from envious glances.

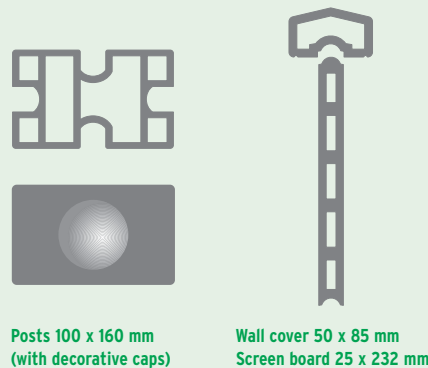

The **megawood®** screen consists of all-round grooved posts, the actual screen profile, two decorative post caps and a wall cover incl. fixing kit, all of which can be combined in a modular concept.

Take a seat on our **megawood®** relaxation bench, rather than on garden furniture that suffer from weather exposure. Enjoy the advantages of a weather-resistant terrace bench even in winter, because our benches are suitable for the outdoors in any weather.

Of course, all our **megawood®** products have the same proven material properties: They are natural, long-lasting, durable.
